Our History

Nest Collective's path.

- Introduction

Introduction

Nest Collective was founded in September of 2015 by a group of three small studios, with a total of 12 elements, sharing a common love for creating great products for both clients and ourselves. Over the last few years, Nest already worked in software projects from a large range of different areas, such as healthcare, web, aerospace, entertainment,telecommunications and other industries with clients and partners from all over the world.

Nest Collective also has been organizing dozens of events, meetups, workshops and training sessions. For all these reasons Nest is currently one of the organisations leading the tech scene in Portugal.
